12:00pm – 1:00pm

ETHICAL LEGAL RESEARCH WITH GENERATIVE AI

1 hour participatory California Legal Ethics MCLE credit

No-cost, free event

Program Description

This CLE presentation is for legal professionals who want a better understanding of the intersection between generative AI and legal ethics. Beginning with a foundational overview of AI and its generative capabilities, participants will explore the ethical implications as outlined by the American Bar Association (ABA) model rules. Key topics include maintaining competency (Rule 1.1), ensuring confidentiality (Rule 1.6), and effective supervision (Rule 5.1) in the context of AI use. The course will also address potential sanctions for unethical AI practices and provide insights into the application of AI in legal research tools, emphasizing ethical principles and considerations. Participants will engage in discussions on specific ethical issues such as AI hallucinations, supervisory concerns, and confidentiality challenges. The course concludes with a review of ethical AI use policies within law firms and an open discussion to consolidate learning and address participant queries. This course is designed to equip legal professionals with the knowledge and tools necessary to ethically integrate AI into their practice.

About the Speaker

Brandon Marquette, AAS, BS
Telephonic Solutions Consultant

Brandon Marquette serves as a Telephonic Solutions Consultant for LexisNexis' State and Local Government Division, where he leverages his distinctive background in adult learning, facilitation, and legal expertise to drive training and development initiatives for government accounts across eleven western states.

Brandon holds an Associate of Applied Sciences in Legal Studies from Sinclair Community College, where he was nominated to the National Society of Leadership and Success and earned Dean's List recognition. He has also earned his Bachelor of Science in Criminal Justice from Ohio University. Operating from Dayton, Ohio, Brandon manages State and Local Government accounts across Arizona, Colorado, Texas, Utah, and New Mexico.

Advance registration required: register via [Microsoft Teams \(LexisNexis\)](#) by noon the day of the program to receive a link. LexisNexis will handle the registration and MCLE credit process.
